Adobe Acrobat Reader for Palm OS software

Adobe® Acrobat® Reader® for Palm OS® lets you view Adobe Portable Document Format (PDF) files on handheld devices running Palm OS.

Part of Adobe's [Network Publishing](#) vision, this new addition to the Acrobat family enables you to read Adobe PDF files downloaded from a desktop computer, freeing you to access them anywhere. Acrobat Reader for Palm OS software preserves the rich content of Adobe PDF files - styled text, images, and bookmarks - and adapts it for viewing on small screens. You can also search for a specific word or phrase.

Viewing Adobe PDF files

Acrobat Reader for Palm OS includes two components that work together::

- **The desktop application** (and conduit during HotSync®) runs on the Windows platform. It prepares PDF files for the Palm OS and transports them to the user's handheld device.
- **The reader** is the Palm OS application, designed to accommodate the characteristics of small-screen devices.

Tagged Adobe PDF files created with Adobe Acrobat 5.0 provide the best reading experience on handheld devices because the contents can be easily reflowed to fit the screen size. Results for non-tagged PDF files will vary depending on the quality and complexity of the source files.

Tagged Adobe PDF files can be generated from Adobe PageMaker® 7.0, Microsoft Office 2000 applications (with Acrobat 5.0 installed), by using the Acrobat 5.0 Web Capture feature, by using the Make Accessible plug-in for Acrobat 5.0, or through Acrobat Distiller. The Make Accessible plug-in also allows you to create a tagged Adobe PDF file from a non-tagged PDF file. Tagged PDF documents contain more information than their non-tagged equivalents and may have larger file sizes. More information on tagged PDF is available on the Adobe accessibility Web site.

System requirements

- Palm OS device with English version of Palm OS 3.1 or higher (Palm m100, Palm m105, Palm m500, Palm m505, Palm IIIe, Palm IIIx, Palm IIIxe, Palm IIIC, Palm V, Palm Vx, Palm VII, Palm VIIx, Handspring Visor, Handspring Visor Deluxe, Handspring Platinum Visor, Handspring Visor Prism, Handspring Visor Edge, Sony Clie PEG-S300, Sony Clie PEG-N710C). Reader for Palm OS may be compatible with newer Palm OS devices not listed.
- 200 KB of available space on Palm OS device
- 2 MB of RAM on Palm OS device (8 MB recommended)
- Palm Desktop 3.0.1 or higher
- Intel® Pentium® processor
- 16 MB of RAM
- 20 MB of available hard-disk space
- Microsoft® Windows® 98, Windows Millennium, Windows NT® 4.0, or Windows 2000

Support for Mac OS coming in a future release.

Download Acrobat Reader for Palm OS

Follow these steps to download and install Acrobat Reader for Palm OS.

1. Select "English" and "Palm OS" in the language and platform menus on the Acrobat Reader [download page](#). Download the installer file.
2. Double click on the downloaded file and follow the installation instructions.
3. After installing the software, run the "Acrobat Palm Desktop" application from the Start menu or icon placed on your desktop. The User Guide, accessible through the desktop application, contains detailed information on using the software.
